Art Unit: 1732

1. This application contains claims directed to the following patentably distinct species:

Species A, that directed to employing stand-offs which form notches in the container (ie, claims 1-8);

Species B, that directed to forming a container with the top edge of the sheet below the shoulder portion (ie, claims 9-16); and

Species C, that directed to making a container with upper and lower disc-like portions (ie, claims 17-20). The species are independent or distinct because each species requires different features which are clearly not required by the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Art Unit: 1732

2. In view of the restriction requirement, comments directed to applicant's response and the art rejection will be held in abeyance pending an election.
